Comments: UAA survey occurred in March, 2005 and no uses were observed. The stream met the maximum depth criterion at 1 out of 6 sites; the average depth criterion at 0 out of 6 sites. There were footprints and painting on the bridge and a campsite. Because of the overall shallow depth of the stream, the committee recommends removal of the WBCR designation. However, consideration for SCR designation is recommended.

Committee Recommendation: ☐ Retain Use ☐ Modify Use ☒ Remove Use
